

Maintenance Management Service

MAINTENANCE MANAGEMENT SOLUTIONS THAT WORK FOR YOUR BUSINESS

Preventative Maintenance Software programs, known as CMMS are fast becoming the standard mode of managing maintenance operations today. One of the main preventative maintenance benefits comes with the increase in uptime your facility will see. Nebula's preventative maintenance program helps you to keep your machinery, vehicles, systems, and equipment running.

The major drawback to effective implementation of a CMMS system is the significant human resources required to collect and enter data. When time consuming data collection and data entry is not done on a regular basis the investment in software is wasted and the benefits of the CMMS program are not realized.

Nebula combines the power of CMM software with our automatic data collection hardware to provide a cost effective solution requiring virtually zero resources dedicated to managing the CMMS system. The result is an effectively implemented preventive maintenance system where you concentrate on business.

For as little as \$1 per day we provide you with our wireless data collection modules, set-up and maintain your equipment data base, collect data on a daily basis and deliver reports to your in-box.

Simplifying Preventive Maintenance

SERVICE INCLUDES

MONITORING HARDWARE AND SOFTWARE

Installation and set-up of our data collection hardware and software is performed by our factory trained technicians.

DATABASE MANAGEMENT

We set up, maintain and manage your equipment database. The data is stored on our secure server.

DATA COLLECTION AND ENTRY

Operational data from each piece of equipment is automatically collected by our Data Collection Module and transferred into the database.

AUTOMATIC WORK ORDER REPORTS

Work orders are automatically generated and delivered to your inbox via e-mail.

ALARM MONITORING

Text message to your cell phone when any critical parameter goes out of specification.

AFFORDABLE

No hardware or software to buy. No human resources needed for data collection or data entry. One low monthly fee covers it all.
